LiftIQ

Waiting for a lift becomes a thing of the past.

AI-powered predictive crowd management for the lifts you already have. No lift replacement. No OEM changes.

Retrofit install **No lift downtime** **Video stays on-device**

THE PROBLEM

5–15 minutes lost, every day.

Residents of high-rise societies lose an estimated 5–15 minutes a day to overcrowded lifts at peak hours (to be validated in our pilot). Replacing or adding lifts costs lakhs and disrupts everyone.

OUR SOLUTION

Smart lifts, without new lifts.

LiftIQ reuses your lobby CCTV and adds a compact edge-AI controller that predicts floor-wise demand and optimises lift dispatch. Your lifts keep their own controllers.

WHY SOCIETIES CHOOSE LIFTIQ

Shorter waits at peak
Target to be measured in the pilot.

Fairer for everyone
Fewer full-lift skips for elderly residents and families.

Less wear
Smoother load spreading, fewer complaints.

HOW IT WORKS

1

Sense

Counts crowds per lobby and floor from existing CCTV.

2

Predict

Forecasts floor-wise demand for the next few minutes.

3

Dispatch

Sends optimised dispatch to the lifts.

4

Learn

Every ride improves the next prediction.

WHAT YOU GET

- Edge-AI controller, mounted outside the lift
- Reuse of existing lobby CCTV
- Prediction and dispatch engine
- Committee dashboard with wait-time reports

PRICING PER BUILDING

₹1.2 lakh

one-time installation

₹3,000/mo

subscription, about ₹30 per flat for 100 flats

Illustrative; to be validated with RWAs.

PRIVACY AND SAFETY FIRST

Video is processed on the device and only counts leave it. Society consent and clear notices come first. Normal lift operation is never compromised.

LET'S PILOT IT

We are looking for 2–3 societies to host a free or low-cost pilot with measured results.

LiftIQ

Team Ultron: Komolika, Zainab Farooqui, Samrudhi Jadhav, Sanika Sonavane
